Message from the

Executive Chairman

As we reflect on 2025, I am proud of the momentum SourceFuse has generated across technology, partnerships, and community engagement. At our core, we remain deeply committed to being a trusted, long-term partner to our customers, one that understands their business, aligns with their strategic roadmaps, and helps them navigate an increasingly complex digital landscape shaped by AI and rapid innovation.

This year marked a significant evolution in how we help customers create value. Generative AI and Agentic AI moved from promise to practice, and SourceFuse has been at the forefront of enabling enterprises to adopt these technologies responsibly and at scale. From intelligent platforms and autonomous agents to AI-driven workflows, our teams are helping customers turn innovation into measurable outcomes.

Our partnership with Amazon Web Services continued to be a cornerstone of this success. As an **AWS Premier Tier Services Partner**, we further strengthened our capabilities by achieving the AWS AI Competency, AWS Networking Competency, and the AWS DMS SDP. These milestones reflect our technical depth and reinforce our ability to deliver secure, scalable, and AI-ready cloud solutions for customers worldwide.

We also expanded our ecosystem through a strategic partnership with Databricks, accelerating enterprise-wide data, AI, and Generative AI transformation. By combining

modernization expertise with the Databricks Lakehouse Platform, we are helping organizations unlock the full value of their data and power the next generation of AI-driven decision-making.

Beyond technology, community remains central to who we are. Through Jax Tech, proudly sponsored by SourceFuse, we continued to bring together technologists, founders, and business leaders in Jacksonville, fostering collaboration, knowledge sharing, and conversations around AI, innovation, and the future of technology.

As we look ahead, I am confident in SourceFuse's direction and deeply appreciative of our clients, partners, and exceptional team. Together, we will continue to build, innovate, and lead, shaping the future of cloud, data, and AI-enabled transformation.

Jax Tech: Shaping the Future of Tech

Jax Tech, proudly sponsored by SourceFuse, continued to be a vital hub for Jacksonville's technology community in 2025. Building on its mission to foster collaboration and innovation, Jax Tech placed a strong emphasis on the growing impact of artificial intelligence across industries. Throughout the year, events brought together founders, technologists, and business leaders to explore how AI is transforming areas such as financial services, SaaS, and digital commerce through real-world applications and expert insights. By encouraging meaningful conversations, knowledge sharing, and connections, Jax Tech remains committed to empowering the local tech ecosystem to learn, grow, and drive innovation in Jacksonville.

Gautam Ghai

Message from the

Chief Executive Officer

As we look back on 2025, what stands out most to me is not any single milestone, but the clarity with which SourceFuse evolved. This was the year when cloud modernization, data, and AI stopped being parallel conversations and became one integrated mandate to build systems that are intelligent by design, resilient by default, and grounded in real business outcomes.

Across the industry, Generative AI and the early emergence of Agentic AI moved decisively from proofs-of-concept into enterprise execution. At SourceFuse, we leaned into this shift with intent. We invested deeply in strengthening our core delivery frameworks, embedding AI into our ARC modernization approach, and ensuring that intelligence, security, and scalability were not layered on later, but built in from day one. Our focus throughout the year remained practical, helping customers modernize legacy estates, operationalize data, and adopt AI responsibly in ways that create durable value.

A key highlight of the year was the continued strengthening of our partnership with Amazon Web Services. Achieving the **AWS AI Competency**, AWS Networking Competency, and the AWS Database Migration Service (DMS) Service Delivery Program reinforced our standing as an AWS Premier Tier Partner and validated the depth of our capabilities across modernization, infrastructure, and AI-led transformation.

In parallel, our partnership with Databricks marked an important step in our data and AI journey. Together, we are enabling enterprises to unify data estates, modernize analytics, and move toward real-time, AI-driven decision-making, an essential foundation for responsible Generative and Agentic AI adoption. 2025 also brought meaningful external recognition of the work our teams have been doing year after year. SourceFuse was honored for the **seventh time**

on the Inc. 5000 list of Fastest-Growing Private Companies, named to the **CRN 2025 MSP 500 in the Security 100** category, and proudly marked 19 years of building, learning, and adapting, an achievement made possible by long-standing client trust and the commitment of our global teams.

"I am deeply grateful to our clients, partners, and every member of the SourceFuse team for their trust, collaboration, and belief in what we are building together. The future of cloud, data, and AI-led transformation is being shaped right now, and we are proud to be part of that work."

Partner Ecosystem Highlights

Advancing AWS Excellence with AI-Driven Innovation

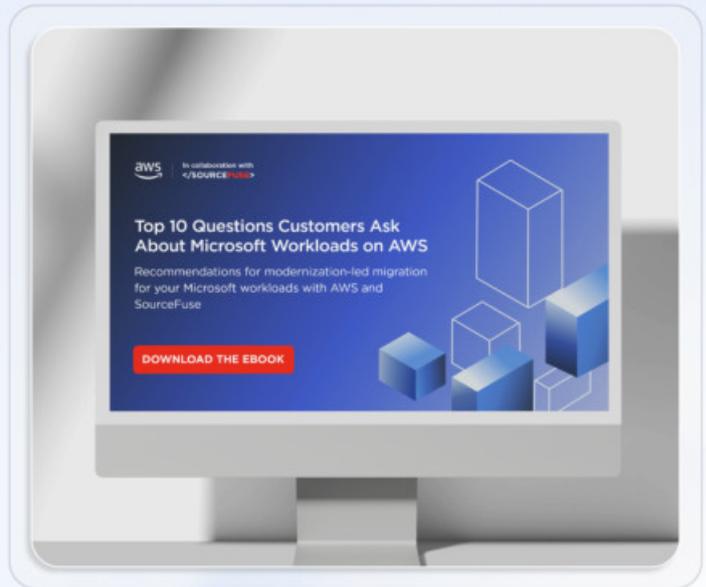

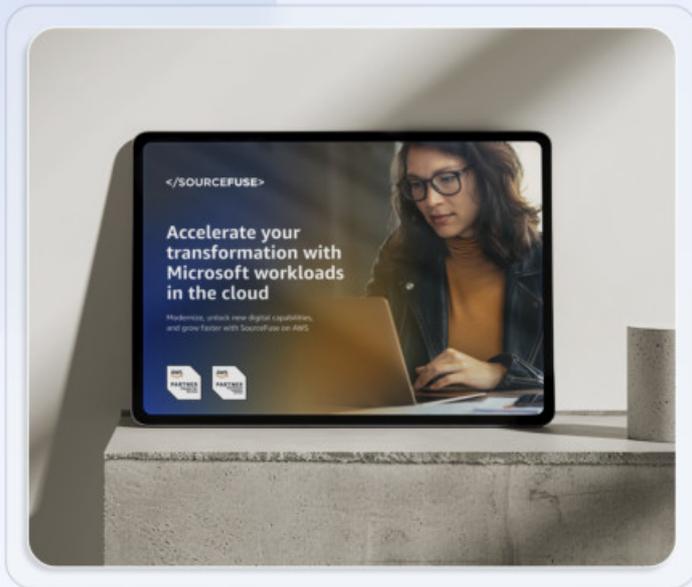

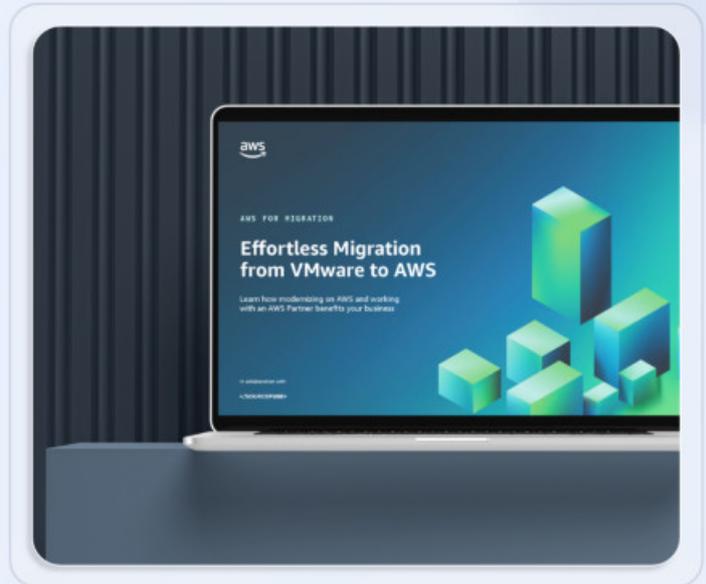

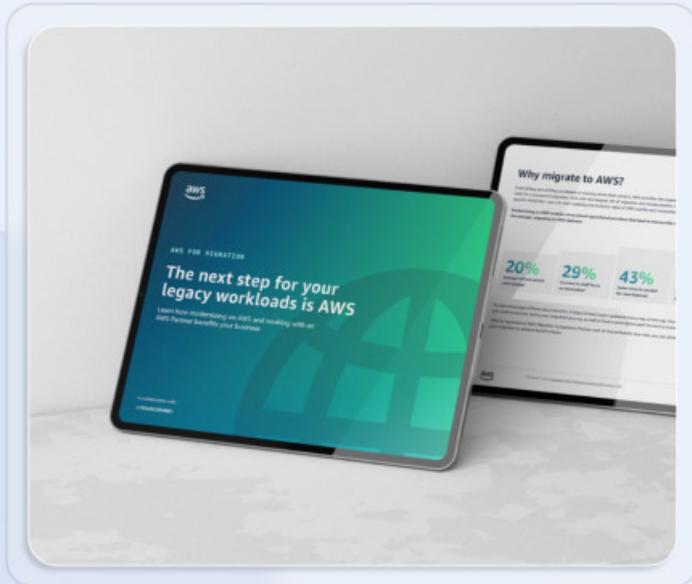

Building on its AWS Premier Tier Services Partner status, SourceFuse accelerated its momentum in 2025 by deepening its expertise across cloud, AI, and next-generation architectures. A major milestone this year was achieving the AWS AI Competency and AWS Networking Competency, reinforcing SourceFuse's ability to deliver secure, scalable, and intelligent cloud solutions.

With a strong focus on Generative AI and Agentic AI, SourceFuse helped customers move beyond experimentation to real-world impact, designing AI-powered platforms, autonomous agents, and intelligent workflows that drive efficiency, insight, and innovation. These advancements, combined with continued AWS Partner recognitions and successful customer outcomes, underscore SourceFuse's commitment to pushing boundaries, delivering measurable value, and shaping the future of cloud and AI-enabled transformation.

SourceFuse and AWS: Joint Campaigns Worldwide

In 2025, SourceFuse continued its strong collaboration with AWS through a series of high-impact, global joint campaigns designed to help organizations migrate, modernize, and optimize on AWS. Co-branded demand-generation initiatives across the US, UK, Australia, EMEA, and India, including targeted email campaigns, **CXO roundtables**, and executive engagements, highlighted cost optimization, Partner-Led Support (PLS), and modernization outcomes, driving strong market traction and customer interest.

SourceFuse and AWS also co-hosted strategic in-person and virtual events focused on Generative AI, AI-driven development lifecycles, and large-scale modernization, engaging senior technology leaders in discussions on innovation, efficiency, and transformation. These campaigns reinforced SourceFuse's position as a trusted AWS Premier Partner, delivering measurable value, thought leadership, and customer-centric cloud solutions worldwide.

Strengthening AWS Collaboration Across Key Global Markets

In 2025, SourceFuse further strengthened its global AWS partnership by establishing an expanded presence across the United States, Australia, India, and the UK, supported by dedicated Partner Development Managers, Partner Solution Architects & Partner Marketing Managers. This enhanced regional alignment enables closer collaboration with AWS teams, faster go-to-market execution, and deeper engagement with customers across key geographies.

With localized expertise and coordinated marketing and partner support, SourceFuse is better positioned to help organizations accelerate cloud adoption, modernization, and AI-led transformation on AWS. This expanded partnership structure reinforces SourceFuse's commitment to delivering consistent, high-quality outcomes while supporting customer growth and innovation worldwide.

Future Outlook and Vision

Kabir Chandhoke

Message from the

Chief Operating Officer

At SourceFuse, AI is increasingly embedded into our day-to-day delivery and operational practices through its integration across the Software Development Life Cycle (SDLC) and the adoption of internal AI tooling to improve speed, quality, and reliability. Our teams are leveraging AI for code assistance, performance optimization, automated security scans, intelligent testing, and AI-powered build and deployment pipelines, driving measurable gains in efficiency and delivery outcomes.

To further encourage innovation, we launched the Creative AI Tooling Award, recognizing SourceFuse employees who apply AI in novel and impactful ways, whether by optimizing delivery pipelines, strengthening security, or inventing entirely new AI-driven workflows. These initiatives reflect our commitment to empowering teams, fostering experimentation, and staying ahead of the curve as AI reshapes enterprise-scale systems and operations.

“The last couple of years were about AI answering questions and executing repeatable tasks. 2026 is going to be about AI running autonomous business systems (departments, BUs, and even entire organizations). This will be enabled by having the right data platform, agents, and a key missing piece, that is, context graphs, to support these ontologies for large organizations, such as enterprises and governments. SourceFuse wants to be ahead of the curve in enabling what it sees as the most exciting and transformational time in building these ontology systems, and is making the required investments and partnerships to do so.”

SourceFuse in the News

</SOURCEFUSE> X  databricks

Powering the Future of Data, Analytics & AI

Databricks X SourceFuse Partnership

In 2025, SourceFuse launched a strategic global partnership with Databricks, a pivotal milestone in advancing our enterprise Data and AI initiatives. This partnership represents a deliberate investment in building a modern, AI-ready data foundation for customers, positioning Databricks as the core intelligence layer within SourceFuse's modernization-led transformation strategy.

Grounded in SourceFuse's deep expertise in application and database modernization and strengthened by our AWS Premier Tier Services Partner status, the Databricks partnership enables customers to move from fragmented, legacy data environments to unified, scalable, and intelligent data platforms. Together, we help enterprises unlock real-time analytics, power AI applications and agents, and accelerate business decision-making at scale.

To operationalize this strategy, SourceFuse rapidly built a strong Databricks capability, achieving 125 Databricks certifications in under two months and completing 70 GTM and accreditation badges across Generative AI, AI agents, analytics, and industry-focused presales. This certification-led approach ensures we deliver enterprise-grade solutions with speed, confidence, and measurable impact.

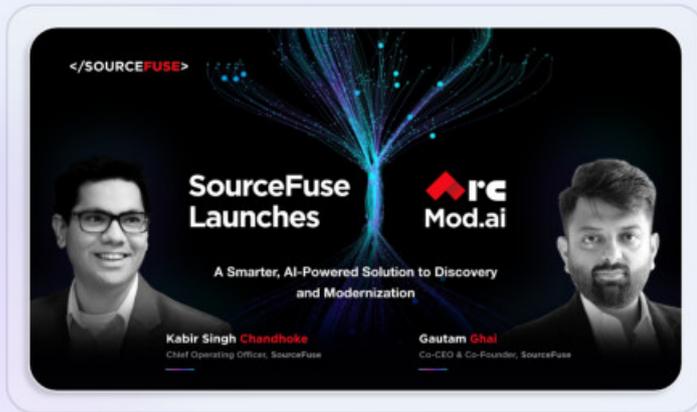

The partnership focuses on transforming database modernization into data value creation, with Databricks positioned as the default platform for advanced analytics and AI in modernization programs, particularly for organizations burdened by legacy databases, high licensing costs, and data silos. The collaborative solutions offer scalable innovation, AI-driven insights, and regulatory-ready platforms across various sectors. These industries include financial services, healthcare and life sciences, ISVs, and telecom.

The Databricks partnership is a cornerstone of this journey, enabling SourceFuse to help enterprises transition from modernization to AI-powered, autonomous, data-driven systems and reinforcing our role as a trusted partner in the next phase of enterprise transformation.

Global Media Presence

In 2025, SourceFuse continued to expand its **global media footprint**, earning coverage across leading international business, technology, and cloud-focused publications. Major announcements, including strategic partnerships, AWS competency achievements, AI innovation milestones, and industry recognitions, were widely featured through global newswire distributions and regional media outlets, amplifying SourceFuse's voice across North America, Europe, APAC, and beyond.

This sustained media presence reinforced SourceFuse's position as a trusted authority in cloud modernization, data, Generative AI, and Agentic AI transformation. Consistent global visibility strengthened brand credibility, increased engagement with enterprise decision-makers, and supported growth in key markets including the United States, the United Kingdom, Australia, India, and Japan. Through strategic storytelling and thought leadership, SourceFuse continued to shape conversations around modernization-led transformation and AI-driven innovation on a global stage.

Success Stories

HireRoad

Industry
HR Tech / SaaS

Geography
United States

Engagement
GenAI-led Analytics
Modernization + AWS MAP

Context

As HireRoad expanded its SaaS-based HR platform across recruitment, onboarding, learning, and people analytics, leadership identified a growing gap: traditional dashboards were limiting real-time insight, slowing decision-making, and constraining the ability to apply predictive intelligence across global HR teams.

SourceFuse Engagement

SourceFuse partnered with HireRoad to reimagine its analytics platform using GenAI-driven, conversational analytics on AWS. Static dashboards were transformed into an interactive, dialogue-based experience, enabling HR leaders to query data in natural language and receive real-time insights, diagnostics, and forecasts.

The engagement leveraged Amazon Bedrock, large language models, and modern event-driven architectures, enabling predictive and diagnostic analytics while reducing dependency on manual analyst workflows. In parallel, SourceFuse led HireRoad through the AWS Migration Acceleration Program (MAP), successfully completing the Assess and Mobilize phases, with the Migrate phase currently underway.

Impact

- 4x faster access to insights for HR leaders
- -60% reduction in analyst dependency, accelerating decision cycles
- Increased engagement across global HR teams through conversational analytics
- Established a scalable GenAI foundation for predictive, real-time people intelligence
- A clear migration roadmap established through AWS MAP, de-risking large-scale cloud modernization

Success Stories

The Leading Telecommunications Solutions Provider

Industry
Telecommunications

Geography
India / Global

Engagement
SaaS Platform Transformation

Context

As part of its strategic shift from product-led delivery to a SaaS-first business model, the leading telecommunications solutions provider needed to rapidly SaaS-enable its flagship BSS platform while supporting diverse telco customer requirements across Tier 1, Tier 2, and Tier 3 markets.

SourceFuse Engagement

SourceFuse partnered with the leading telecommunications solutions provider and AWS to architect and deliver the SaaS control plane for their flagship platform using ARC SaaS, SourceFuse's open-source SaaS accelerator. SourceFuse owned the multi-tenant control plane, including onboarding, provisioning, observability, and billing, while the organization focused on the application plane, enabling parallel execution and accelerated go-to-market.

Impact

- Reduced SaaS go-to-market timeline from 9-12 months to ~3 months
- Accelerated overall platform GTM by an estimated 6-9 months
- Enabled tiered tenancy models with full isolation and data residency compliance
- Laid a scalable foundation for SaaS transformation across the organization's broader

Success Stories

Industry
Healthcare & Life Sciences

Geography
United States

Engagement
Custom Telehealth
Platform Development

Context

The rapid acceleration of virtual care exposed limitations in existing telemedicine systems, fragmented workflows, limited interoperability, and compliance challenges hindered scalable healthcare delivery.

SourceFuse Engagement

SourceFuse partnered with Telescope Health to design and build a HIPAA-compliant, cloud-native telehealth platform that unified disparate services into a single, interoperable system. The engagement included deep domain-led architecture design, workflow customization for non-consumer healthcare operations, and secure data orchestration across the care ecosystem.

Impact

- Established a single source of truth across patient, provider, and operational data
- Enabled secure, compliant virtual care delivery at scale
- Eliminated manual data handling and reduced operational overhead
- Improved clinician productivity, allowing more time for direct patient care

Success Stories

Japanese Global Technology Conglomerate

Industry

Geography
Japan

Engagement
Agentic AI-Driven Project & Portfolio Intelligence Platform

Context

A Japanese global technology conglomerate operates one of Japan's most advanced cloud-native 4G and 5G networks. As project scale and organizational complexity increased, RMI faced rising costs and inefficiencies driven by fragmented data, manual planning, and static reporting across tools such as Excel, Smartsheet, MS Project, and PowerPoint. Leadership required a centralized, intelligent system capable of not only consolidating data but also actively assisting, reasoning, and automating project operations at scale.

SourceFuse Engagement

SourceFuse partnered with the Japanese global technology conglomerate to design and deliver a production-grade Agentic AI-powered project management and intelligence platform.

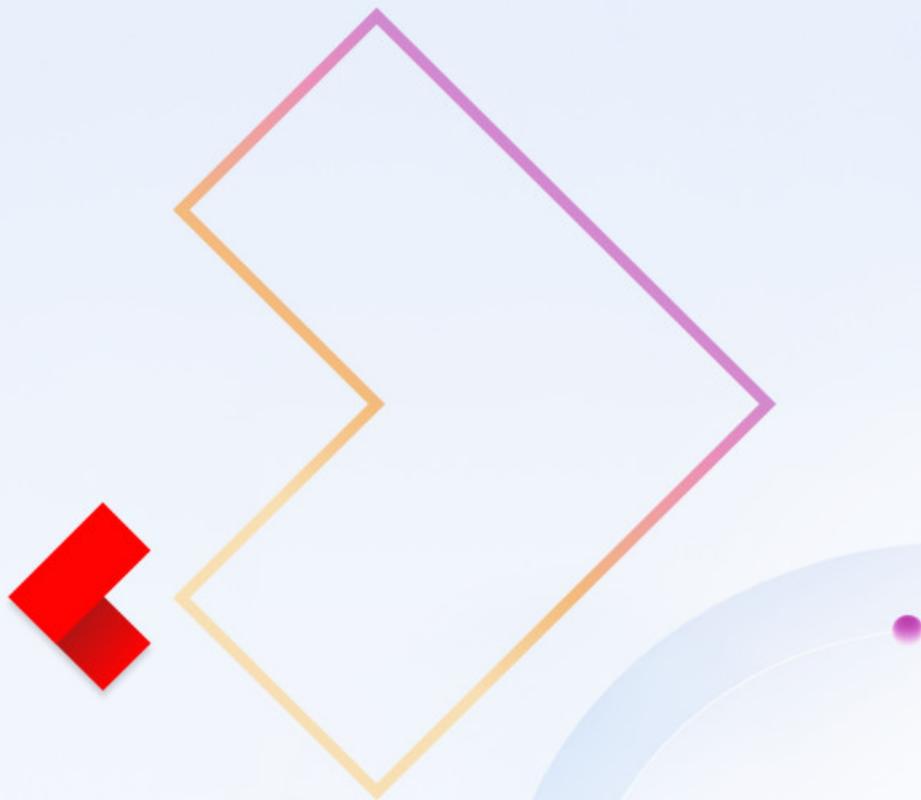

At the core of the solution was a multi-agent AI architecture, where specialized AI agents collaboratively planned, analyzed, summarized, automated, and governed project workflows. These agents operated across the full project lifecycle, ingesting structured and unstructured data, reasoning over context, and executing actions autonomously across enterprise tools. Key agent capabilities included:

- **Project Planner Agents** that auto-generated execution plans, RAID logs, and timelines from documents (DOCX, XLSX, PPTX, PDFs)
- **Project Summarization Agents** that continuously assessed health, risks, delays, and milestones
- **Workflow Automation Agents** that created end-to-end workflows from plain English
- **Meeting Intelligence Agents** that produced structured summaries, action items, and task updates directly from transcripts
- **Dashboard & Visualization Agents** that generated real-time dashboards from natural language prompts
- **Conversational Help Agents** that enabled self-service onboarding, training, and in-app support

The platform was built using agent orchestration frameworks (CrewAI) and Model Context Protocol (MCP) for seamless coordination across tools such as Jira, Asana, Excel, Zoom, and internal data systems, deployed via a containerized, cloud-native architecture with OpenAI integration.

Impact

- \$750K in annual cost savings by eliminating Smartsheet licensing
- Adoption across 6,000+ users, 4,000+ projects, and 2,000+ dashboards
- -1,500 employee timesheets tracked monthly, improving capacity and delivery planning
- Significant reduction in manual planning, reporting, and post-meeting overhead through autonomous AI agents
- Real-time visibility for Finance and Procurement into CapEx vs. OpEx, driven by continuously updated, AI-generated insights
- Faster execution cycles as project intelligence shifted from static dashboards to autonomous, reasoning-driven agents

Success Stories

Japanese Global Technology Conglomerate

Industry
Telecommunications,
Fintech, Digital Platforms

Geography
Japan

Engagement
Agentic AI-Driven Opex Analytics
with Conversational Intelligence

Context

A Japanese global technology conglomerate operates at scale across telecom, fintech, and digital services, generating large volumes of financial and operational documents across planning, procurement, billing, and network operations. Opex analysis relied on manual document downloads, SQL queries, spreadsheet consolidation, and repeated validation cycles, resulting in slow turnaround times, inconsistent insights, and high analyst dependency.

The company needed a solution that could autonomously process financial data end-to-end, while also allowing business and finance leaders to interact with insights conversationally, without technical intermediaries.

SourceFuse Engagement

SourceFuse designed and delivered Opex Analytics (OAT), a production-grade, agentic AI platform that combines autonomous financial agents with a conversational AI interface to deliver real-time, decision-ready insights.

At the core of OAT is a role-based, multi-agent architecture, orchestrated to function as a single autonomous pipeline. These agents are surfaced to users through a conversational AI chatbot, which acts as the primary interaction layer for querying, exploration, and decision support.

Agent Architecture

Document Type Classifier Agent: Categorizes incoming financial documents by type, content, and business context to route them correctly.

Entity Extraction Agent: Extracts structured and unstructured financial data from documents and source systems.

Validation & Guardrails Agent: Applies accuracy checks, completeness rules, and consistency validations to ensure data integrity and audit readiness.

Summarization & Data Publishing Agent: Generates concise summaries from validated data and publishes insights into analytics and reporting systems.

Conversational AI Interface (Chatbot): Serves as the human-facing layer of the system, allowing users to:

- Ask natural-language questions about Opex, trends, anomalies, and KPIs
- Trigger agent workflows without SQL, BI tools, or manual reporting
- Instantly visualize data and retrieve validated insights in real time

Together, these agents operate autonomously while the chatbot provides guided, explainable access to complex financial intelligence, bridging the gap between AI automation and human decision-making.

Impact

- Reduced Opex reporting cycles from days to minutes
- Eliminated manual data extraction, spreadsheet consolidation, and repetitive validation
- Improved accuracy and consistency through automated validation guardrails
- Enabled finance and leadership teams to self-serve insights via conversational AI
- Significantly reduced analyst dependency while increasing adoption and engagement

Success Stories

Australia's Leading High-Volume Installation and Maintenance Service Provider

Industry
Telecommunications
& Utilities

Geography
Australia (APJ)

Engagement
VMware to AWS Native
Migration (VMC-A → AWS EC2)

Context

Australia's leading high-volume installation and maintenance service provider, an S&P/ASX 300-listed company, plays a critical role in maintaining essential telecommunications and utility networks across Australia. Facing an impending VMware license renewal and rising infrastructure costs, the organization needed a clear, time-bound migration strategy to move from VMware Cloud on AWS (VMC-A) to a native AWS environment, without disrupting business-critical operations.

Previous migration attempts had been delayed due to cost constraints and execution risk, making speed, financial clarity, and delivery confidence essential.

SourceFuse Engagement

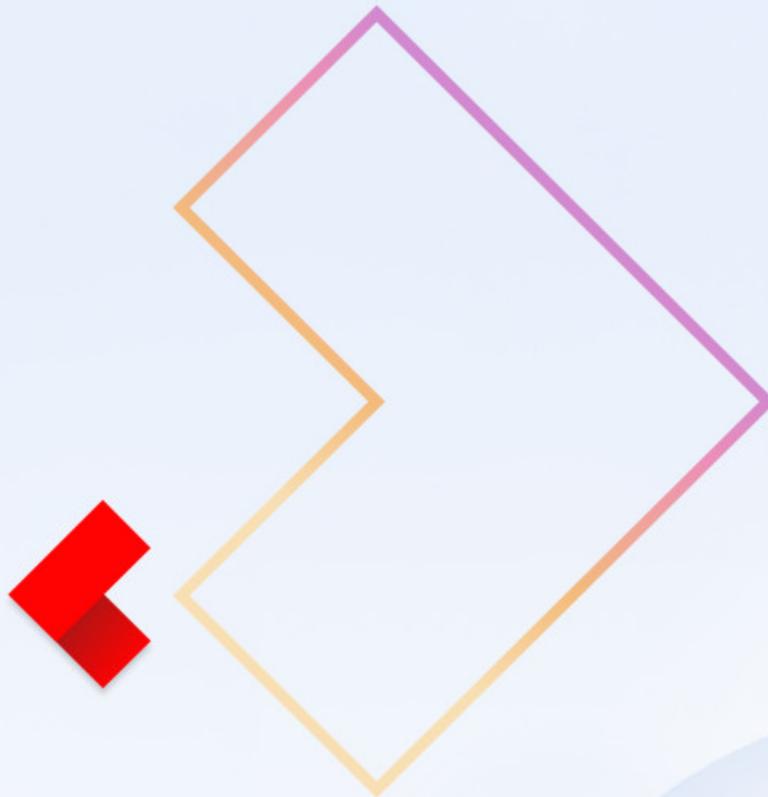

AWS engaged SourceFuse to define and execute a data-driven, accelerated migration strategy ahead of the VMware license renewal deadline.

SourceFuse began with an Optimization and Licensing Assessment (OLA), followed by a VMware Modernization Program (VMP) assessment, to compare the cost of VMware renewal against AWS-native infrastructure. Leveraging its position as an AWS Premier Partner and AWS Transform launch partner, SourceFuse designed a comprehensive migration roadmap for transitioning 107 virtual machines, multiple SQL Server workloads, and ~30TB of storage from VMC-A to AWS EC2.

The migration approach utilized AWS Transform, AWS MGN, and AWS-native services, enabling faster execution while minimizing risk. SourceFuse also leveraged AWS funding programs to offset assessment and implementation costs, significantly improving the commercial viability of the project.

Impact

- Identified up to 41% cost savings (≈ USD 128K) by migrating from VMC-A to AWS Native
- Eliminated recurring VMware licensing costs ahead of the November 2025 renewal
- Defined a clear, accelerated migration path for 107 VMs and critical SQL workloads
- Improved infrastructure flexibility, scalability, and long-term cost control
- Projected USD 207K+ in annual recurring AWS revenue post-migration

Life at SourceFuse: Celebrating Our Team Spirit

Ravdeep Singh

Message from the

Chief People Officer

At SourceFuse, our people remain at the heart of everything we do. As we look back on 2025, I am proud of how our teams across geographies have continued to embody our **core values** while adapting to an increasingly AI-driven and fast-evolving technology landscape. Our human capital strategy remains focused on building a high-performing, inclusive, and future-ready workforce that is empowered to innovate, collaborate, and deliver meaningful impact for our customers.

With our **growing global presence** across the United States, UK, Australia, Japan, Latin America, and India, we remain committed to fostering a culture where diversity, trust, and respect thrive. Strategic talent acquisition, strong retention practices, and a continued focus on employee well-being have helped us maintain a resilient organization grounded in shared purpose and accountability.

Learning and Development was a key pillar of our people strategy in 2025. We strengthened our culture of continuous learning through global certification programs, internal accreditations, and cross-functional upskilling initiatives. Our teams earned numerous AWS certifications, completed Databricks accreditations across presales, sales, and marketing functions, and participated in internal certification programs that reinforce best practices and technical excellence. These efforts not only enhanced individual capabilities but also elevated our collective ability to deliver secure, scalable, and innovative solutions.

Equally important has been the spirit of mentorship and collaboration that underpins our learning ecosystem. Our mentors and subject-matter experts played a critical role in guiding interns and team members, while individuals like our “certification champions”

went above and beyond to support others on their learning journeys. This culture of knowledge-sharing and mutual growth reflects our belief that success is amplified when we invest in one another.

As we move forward, we will continue to invest in our people through learning, well-being, and inclusive growth because we firmly believe that empowering our teams is the foundation for sustainable business success. I am deeply grateful to our employees for their dedication, resilience, and commitment to excellence. Together, we will continue to learn, grow, and build the future of SourceFuse.

Discover the
People Behind
SourceFuse's Success

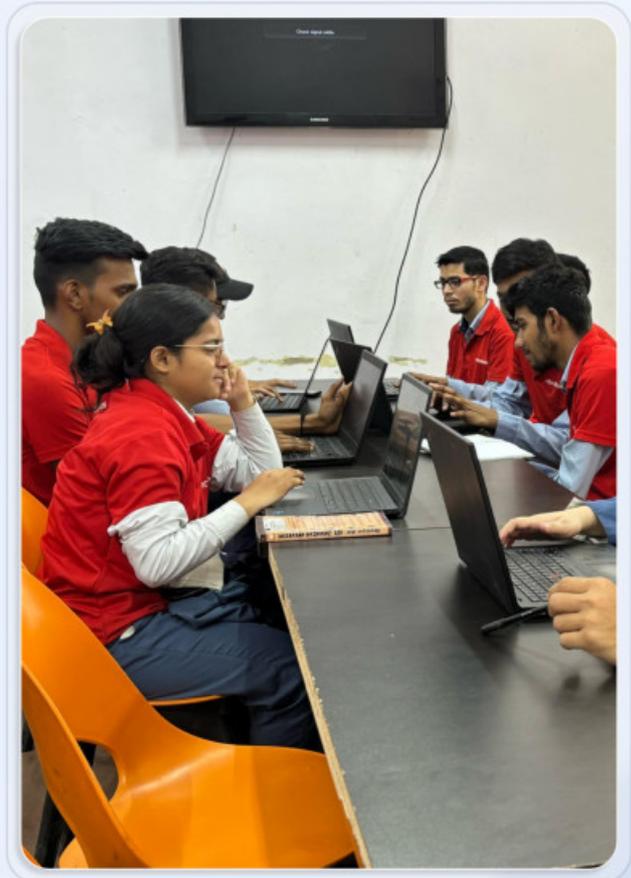

CSR & Charitable Initiatives

CSR Initiatives

In 2025, SourceFuse reaffirmed its commitment to creating meaningful social impact through focused and sustainable **CSR initiatives**. Our efforts center on empowering underserved communities, advancing digital skills, and enabling inclusive growth through technology.

A key highlight was our Harmony - Empowering Tomorrow's Innovators program, which provided hands-on cloud and AWS training to underprivileged youth, helping bridge the digital skills gap and improve employability. A total of 75 students completed the program, passed cloud certification assessments, and many were offered apprenticeship opportunities that strengthened their career pathways. Through partnerships with educational institutions and nonprofit organizations, SourceFuse continues to invest in learning, mentorship, and community development, driving positive change and building a more equitable, technology-enabled future.

Testimonials

SourceFuse is Recognized for Exceptional Customer Satisfaction and AWS Partnerships

SourceFuse has received overwhelming praise from its valued customers for delivering outstanding solutions and services. Our commitment to customer success has been instrumental in fostering long-lasting relationships and driving positive outcomes. We've also received testimonials from AWS, further validating our expertise and dedication to delivering exceptional results. Our testimonials showcase the positive impact of our services on our clients' businesses. From increased revenue and improved efficiency to enhanced customer satisfaction, hear firsthand how we've helped our partners achieve their goals.

Hear from Our Clients: How SourceFuse Transformed Their Businesses

SourceFuse took on every challenge we posed to them with grace and delivered on their targets. In some cases, we have been able to overperform and overachieve on the committed scope due to the combined team effort - for the period of the engagement, they felt like a natural extension to our existing team and collaborated beyond our expectations, helping us adopt new technologies and setting us up for future success. Thank you very much again, and it was an utmost pleasure to work alongside SourceFuse.

Dominik Finke
Lead AI Product Manager, **Comviva**

SourceFuse has been an invaluable partner in developing our telehealth platform, offering deep expertise in relevant technologies and delivering secure, bug-free solutions. They consistently meet evolving project requirements and timelines with flexibility. Their strong communication and collaborative approach ensure a productive relationship, and their work ethic shows in their commitment to meeting deadlines. Additionally, SourceFuse's innovative contributions to strategy, user experience, and project direction have kept our platform ahead of industry trends, making them a trusted partner for our long-term success.

Kelly Smith
Technical Product Development Manager, **Telescope Health**

SourceFuse is a very professional organization. They have a great team and are able to comprehend requirements well, and their team is able to deliver all the assignments on time.

Rajesh Raman
Product Manager, **Rakuten Symphony**

I would highly recommend SourceFuse because of their exceptional expertise and collaborative approach. During my experience working with their team, they demonstrated a clear understanding of our business requirements, even when dealing with complex challenges. They provided well-thought-out solutions that were both practical and effective. Their depth of knowledge and ability to respond promptly made them a reliable and trustworthy partner, making them an excellent choice for anyone seeking dependable and innovative support.

Darren Hnatiw
Global Chief Technology Officer, **Zinc Group**

Great understanding of all AWS services and provide pro-active support in challenging cloud challenges.

Avirag Srivastava
Software Development Team Lead, **Fleet Management Limited**

AWS Recognition of SourceFuse

SourceFuse has proven to be an invaluable strategic partner throughout our customers' cloud and SaaS transformation journey on AWS this past year. Their team exhibits exceptional technical expertise, particularly in SaaS architecture, modernization strategies, and GenAI implementation, while maintaining a laser focus on our customers' desired business outcomes.

What truly distinguishes SourceFuse is its seamless integration with both AWS and customer teams. From implementing SaaS capabilities for AI-driven BSS platforms to pioneering GenAI innovations across marketing and operations, SourceFuse consistently brings practical solutions to complex transformation challenges.

The partnership with SourceFuse has been exceptionally rewarding, and I confidently recommend them as a premier partner for organizations embarking on ambitious modernization initiatives and AI-powered transformations on AWS.

Vishwanatha Nayak
Senior Solutions Architect, AWS India

SourceFuse excelled in driving a complex insurance migration and modernization. Navigating legacy platforms and critical workloads, they ensured stability, resiliency, and focused outcomes. Strong collaboration with AWS scaled execution flawlessly.

Namitha Sharma
Enterprise Account Manager, North, AWS

When it comes to selecting partners in the UK focused on modernization, I prioritize experience above all. SourceFuse stands out among a handful of specialized partners that I choose to collaborate with. Given my limited bandwidth, I'm meticulous about selecting only the best, and SourceFuse consistently proves to be a standout choice.

Accreditations and certificates, including their status as an advanced partner, certainly play a role in this selection. However, what truly sets SourceFuse apart is their wealth of experience. They've accumulated not just certifications but practical, hands-on knowledge over the years.

Another aspect worth highlighting is their adept use of the tooling that we provide. Modernization is often a substantial journey, but the right tools can significantly shorten that path. Whether it's transitioning from SQL to PostgreSQL, embracing open-source modernized environments, or venturing into pure cloud solutions, SourceFuse excels. They leverage our tools for both application and database modernization, showcasing a proficiency that ensures a smoother and more efficient journey.

It's not just about expertise; it's about using the right tools effectively. SourceFuse understands the intricacies of all kinds of modernization, be it app modernization, database modernization, or any other. They maximize the potential of the AWS tools at their disposal. This approach ensures that the customer reaps the benefits of their modernization decision at the earliest possible juncture.

Stuart Moulton
Senior Partner Development Specialist for Windows on AWS
